

OVERVIEW OF TASK FORCES

March, 2018

Smart**Cities**Council®
Australia New Zealand

An opportunity of a century

...is before us, to ensure we unleash the benefits of technology and data to rebalance our social, economic and planetary imbalances.

Smart cities embrace...

Technology

Data

Intelligent Design

... to advance liveability, workability and sustainability

Our Task Forces, and our goals

Smart
Cities
Council
Australia
New Zealand

Built Environment

Positioning the built environment as a platform for digital transformation.

Social Impact

Ensuring that tech and data is a force for social change, equity and opportunity.

Policy & Leadership

Building a policy platform to accelerate smart cities programs and funding.

Urban Mobility

Advocating for sustainable and inclusive mobility systems that build liveable cities.

Centre for Civic Innovation

Promoting digital engagement as a tool for citizen entrepreneurship and innovation.

An aerial photograph of a city street with several cars. Overlaid on the image are several blue Wi-Fi symbols and circular blue highlights around the cars, suggesting a smart city or connected vehicle theme. The text 'What's the role of the Task Forces?' is written in large white font across the center of the image.

What's the role of the Task Forces?

SCCANZ assembles and facilitates Task Forces as a means to provide our partners and affiliated stakeholders with an opportunity to engage with the Council and our activities. The Task Forces are action-based, and typically identify a small number of activities to execute during the year across SCCANZ's four key pillar's of activity:

1. **INFORM** – development of information resources and creation of editorial pieces
2. **EDUCATE** – help shape and deliver educational content, whether it be workshops, masterclasses, webinars etc
3. **CONVENE** – contribute to the planning, development and delivery of events (boardroom meetings, summits, Smart Cities Week
4. **ADVOCATE** – participate in scoping, developing and reviewing smart cities policy initiatives across all tiers of government

INTERESTED?

If you would like to get hands-on with advancing the smart cities movement in ANZ, consider participating or supporting one of our Task Forces.
